Total	18 Parcels	578

Haying conditions are as follows:

- Haying to be conducted between July 10 and August 15, 2019;
- All hay to be removed by October 31, 2019;
- Hay is to be utilized by the successful candidate's livestock and is not to be sold or bartered;
- Successful candidate may fertilize hay fields at their own expense; and

- If more than one party expresses interest, the successful candidate will be determined by proximity to parcel, existing access to hay and need for hay.

All interested parties are encouraged to locate and review the parcel(s) and hay lands prior to submitting an expression of interest. Many of these vacant hay lands have not been cut for several years, so hay quality and land access may be an issue. Satellite maps of these lands are available upon request.

There is also a possibility for a rejuvenation agreement on hay lands that are not currently in a productive state, but have potential.

Please direct expressions of interest prior to July 10, 2019 to: Conrad Olson, FWDF Land Management Co-ordinator at (306) 539-2421 (cell), email: cp.olson@sasktel.net, or Toll Free 1-844-306-3933, Website: www.FWDF.ca.
